Add Your Logo and Menu

You have invested a lot of time and money into developing and promoting your brand, and nothing identifies your restaurant to a person faster than seeing your logo. We will load and display your logo in the search results to ensure that you stand out, and quickly get the attention of our users.

Also, people are 45% more likely to try a restaurant if they can see your menu first. Provide us with a digital copy of your menu, so that our users can view your menu and see what you have to offer.

People love pictures, impacting their decision on where to dine!

Advertise with QuickChat

People are 60% more likely to choose a restaurant if they are able to see pictures of the food and environment. Post pictures of your food, restaurant, staff, or even discount offers in QuickChat and show people why they need to dine with you. All pictures and comments posted in QuickChat are visible to everyone for a week, and you must be physically at your restaurant in order to post. Simply open the QuickTable App on your phone (when you are at your restaurant), select your restaurant in the search results, and then select "QuickChat" to make a post...it's that easy!

Mobile "Get In Line"
Hostess Wait List
Guest Paging

Get In Line and Hostess Wait List

Customers hate to wait for a table, and 52% of all customers will not wait longer than 25 minutes for a table. Stop losing customers during your busiest hours with our Mobile Get-in-Line and Hostess Waitlist. *The larger restaurant chains are now offering this service, and you can too at a fraction of the cost.*

Give your customers the ability to see the wait time for a table, and to add their name through the QuickTable Mobile App before they arrive. The customer's name is automatically added to the Hostess Waitlist and the hostess is notified when the guest physically arrives at your restaurant (*thanks to our use of location services*). This means no more holding tables and no more walk outs!

Table Management

Get rid of your dry erase boards and improve the efficiency of your Hostess operations by using our Table Management services. Your hostess can quickly assign servers to sections, seat guests, keep track of seating counts and rotation, and even view table times all from a tablet. Our Tablet Management was designed by hostesses for hostesses, so it is easy to learn and fun to use.

Guest Paging

Your hostess can easily notify all of your customers on the waitlist via text message or push notification from the Hostess Waitlist tablet to let them know when their table is ready. No more expensive paper hardware systems, or having your hostess search for customers and call out names... simply push the page button and have the customer come to you.

Mobile Carry Out Service

Customers really don't like to call in their order (for many reasons), but it also costs you time and money to staff the phones. It also can result in mistakes, especially when you are busy. This can even lead to unhappy guests who feel ignored when your staff answers a carry out call in from of them.

Offer your customers an easier way to place their order right from their smart phone that will reduce costs, increase your carry out business, and improve the overall customer experience. QuickTable will transform your menu into an easy to use mobile interactive menu that will empower your customers to quickly enter and customize their order. Guests can also save their favorite menu items, so they can reorder even faster in the future.

Time until your order is ready

Thanks to our use of location services, QuickTable will notify your carry out staff when the customer pulls into your parking lot, so you can have their food bagged and ready!

Know when your customers arrive

Dine-In Pre Order

Time plays an important part in the customer's decision on where to eat for lunch or dinner, so offer them pre order service and see an increase in your business. The customer can place their order before they leave, and when they pull into your parking lot you are notified that they have arrived. Once you know the customer is there you can start to process their order ... saving the customer almost 10 minutes of table time.

Mobile Marketing

Build your campaign

Want to know who your customers are, what they like, and have a way to communicate directly with them? Use QuickTable's Web Admin to view information about your customers that have used the app to interact with your restaurant. This includes clicking on your restaurant in the search results, viewing your menu, and using any of the premium services offered in our Silver and Gold plans. Once a customer is linked with your restaurant you can send them mobile notifications and special offers right to their phone that speaks directly to what you know they like.

Offer specials and incentives based on what you know they like, and start driving business in the door!

PLATINUM

\$90 per month

All Gold Features Plus:
Your Own Mobile App
Intelligent Mobile Marketing

Your Own Mobile App

All of the major restaurant chains have their own mobile app, now you can too without spending hundreds of thousands of dollars to develop and support your own!

QuickTable can provide you a quick and inexpensive way to offer your most loyal of customers a mobile app that is branded just for you, and offers them all of the services that are part of our Silver and Gold Plans.

Having your own mobile app empowered with the services customers want is a proven way to help boost customer loyalty and repeat business. Thanks to QuickTable you too can

have your own mobile app and receive the same benefits that the larger restaurant chains do for just a small monthly fee.

**COMPETE
with the big chains,
and truly connect
with your guests!**

Intelligent Mobile Marketing

Sending out occasional mobile notifications is a good way to increase business and build customer loyalty, but being able to send out specific offers, at specific times of the day based on where the customer is physically at can really boost your marketing/sales results.

**80%
OF NOTIFICATIONS
ARE VIEWED
WITHIN
3 MINUTES**

With QuickTable Intelligent Mobile Marketing you can set up "triggers" to send out special offers to specific customers based on time of day, day of week, and the customer's physical location to the restaurant.

Set triggers for your notifications

For instance, if the customer happens to be within 2 miles of your restaurant on a Tuesday between the hours of 11:30 and 1:00 (prime lunch time hours) a notification can be sent to them automatically inviting them to come in and enjoy their favorite menu item for lunch. They have to eat somewhere, and with a properly timed notification, chances are they will be dining with you!
